

Dated equipment. Expensive telecom services. Too many vendors.

Lower Vendor Profits
Increase Your Spending Power
The Vendor Consolidation Program

INNOVATION AT WORK

In partnership with 3Com, the Metropark Vendor Consolidation Program can transform your company's recurring expenses into a new "savings" center, consolidates your many vendors into an easy one call solution, help reduce telecom expenses and provide you with 3Com voice and data equipment ensuring your business has the advanced technology needed for success in today's marketplace.

The Vendor Consolidation Program puts never before seen savings right back into your hands. By applying these savings gained from the consolidated delivery of local and long distance dial-tone, data and Internet bandwidth, and associated systems maintenance, the program can help you affordably deploy advanced productivity enhancing IP telephony, data, and security solutions. You can leverage mandatory and otherwise unrecoverable operating expenses to obtain new systems and services or update existing ones. The greater your monthly expense, the greater the potential financial benefit.

Enhance your business with innovative, secure communications solutions and simplify administering them with single monthly invoices from one provider. The program can cover not only the cost of an advanced IP telephony system, but also the cost for discontinuing a current PBX lease or service contract. To further support company growth, you can upgrade voice and data systems as new products become available. Renewing the program agreement after the first five years can provide your business with a complete technology refresh.

Transform telecom expenses into spending power by joining Metropark's Vendor Consolidation Program.
