

Metropark

New Technology Bringing Back Old Standards

M500 Pro For Small Business

Yes, you can stay informed about all the calls from around your business premises. With the M500 Pro Series from Metropark you can see all the phone lines without losing the powerful IP Cloud features of Metropark's Vista Voice. The M500 Pro has a sleek design, an impressive wireless range, and powerful audio-enhancing technologies. Taking calls from your customers has never been simpler or easier for your team.

Yes, you have scalability with the M500 Pro DECT Multicell Base Station, which can be paired with several base stations for expanded DECT range and call capacity. When you connect the wireless M58 deskset and the wireless M55 cordless handset to the M500 base stations, mobility in your business will never be a problem again, since the system allows your users to be mobile throughout your facility without the need to be tethered to a small area. Because M500 base stations work seamlessly together, you won't experience those frustrating dropped calls as you move around the store, shop, break room, or warehouse.
