Communicate & Collaborate With Everything In One Place

BOOMEA

CHAT
Chat and File Share with your team in the most unique way yet. Similar to the very popular Slack system, you will love staying informed with your team in this new way. Work with your team or anyone in the Company Directory. Announce your Presence in real time and set up private group messages. The unique flexibility and office efficiancy while communicating and collaborating is simply amazing.

WEB VIDEO MEETINGS
A web meeting was always cumbersome to setup and potentially very expensive. Not anymore. Click on Meetings, Click Start or Join Meeting, share the meeting link, and away you go.

CONTACTS
Most collaborations start with a contact. We've made your contacts into something other than a name and number. Now your can see all of your communication history at each contact. Oh, and setup your calls from your contact too.

WEB PHONE & INTEGRATION
Imagine sitting in front of your PC. Your MPVEX Boomea app DINGS and you see a new message from someone on your team. You can respond in chat or click a Quick-Call button or Web Phone and start talking on the phone with them. You can view your real-time call history, view real-time phone presence (BLF), access voicemails, view voicemail transcriptions, access call recordings, heck you can even supervise agents with the Call Center Console built right into MPVEX Boomea. Also, you might want to maintain your call routing and add SMS/MMS messaging to your Boomea dashboard.

MULTIPLE PLATFORMS
Boomea works inside any Internet Browser and you may want to use our downloadable apps for Windows and MacOS PCs. For the mobile workers Boomea Chat is downloadable for iPhone OS and Android smartphones & tablets.
