

# Metropark

Faxing Made Economical & Simple

## Faxboxes

Metropark takes tried-and-true fax technology and adapts it to the modern age by moving transmission over the Internet. That's a fancy way of saying it's time to retire the paper and that old-time fax machine!

The obvious advantage of Metropark's FAXBOXES, compared to traditional analog faxing, is that we save you a ton of money and make sending and receiving faxes a breeze!

### Benefits

- Send faxes from anywhere
- Receive faxes from anywhere
- Greatly reduce costs of fax lines
- Dedicated faxing to company individuals
- Improve regulatory compliance and reduce associated costs
- Indexing for easy retrieval
- Unified workflow

### How It Works

The screenshot shows a web-based faxing interface with the following elements and instructions:

- 1) Enter fax number you are sending to:** A yellow arrow points to the 'To...' field.
- 2) Enter @ then your fax number:** A green arrow points to the '@' symbol in the email address.
- 3) Enter .faxboxes.com after your fax number:** A red arrow points to the '.faxboxes.com' domain.
- 4) Attach 1 document you want to fax (PDF, TIFF, Word, Excel, Powerpoint):** A purple arrow points to the 'Attached' section where a PDF file named 'DOC YOU WANT TO FAX.PDF' (146 KB) is listed.
- 5) Press Send:** A blue arrow points to the 'Send' button.
- A copy of your fax is now in your Sent Folder:** A red text box at the bottom.

The interface includes a menu bar with 'File', 'Message', 'Insert', 'Options', 'Format Text', 'Review', and 'Help'. The title bar reads 'Untitled - Mess...'.
