

Metropark

Making the Smartphone... Smarter!

Nimbus Phone

Whether you have a mobile workforce, a small team of employees who work exclusively remote, or if you just need to receive a call at your desk and your mobile phone at the same time, Metropark's Voice Exchange Nimbus SoftPhone is the ideal productivity tool. Your MPVEX Nimbus Phone can be downloaded from Google Play or the Apple App Store. You can use your Nimbus Phone on Android and Apple smartphones & tablets which are connected to the Internet over WiFi or LTE/4G/5G.

Features

- Make outbound calls from your mobile device as if you were at your desk showing your company telephone number as the outbound caller ID.
- Receive inbound calls by extension number or business telephone number directly on your mobile app.
- Direct dial or Transfer to other MPVEX extensions by dialing their extension number.
- See the real time Presence of each Metropark Voice Exchange phone user separated by group or team.
- Configure your Device Users Find Me Follow Me (FMFM) Device settings.
- Voicemail playback and management.
- Make adjustments to your call routing or FMFM Time of Day schedule.
- Browse your internal company directly with single-click calling.
- Access Contacts from your mobile device.
- Set up speed dial (QuickDial) from your mobile app home screen.
- If you have SMS Messaging enabled, enjoy an easy way to send and receive SMS/MMS messages from your business phone number(s).
