Wireless Broadband

Solving Unique Problems with Fast and Affordable Solutions

Wireless isn't just for smartphones anymore. It's evolved to help your business increase your network efficiency, agility, and business operations at nearly every level. Whether it's used as the Primary Internet Service or a vital failover service at any of your locations, Metropark Wireless Broadband can provide a cost effective network alternative for business-critical applications, a diverse backup option for your data applications, and a quick deployment option for new and remote business locations.

Wireless Broadband 25

Up to 25Mbps of Bandwidth with 300GB of Wireless Data per month

Wireless Broadband 50

Up to 50Mbps of Bandwidth with 300GB of Wireless Data per month

Wireless Broadband 100

Up to 100Mbps of Bandwidth with 300GB of Wireless Data per month

Metropark Wireless Broadband Powered By

AT&T

Wireless Broadband requires a wireless router with a Category 18 or higher modem and use where enhanced AT&T 4G LTE-Advance service or 5G and/or 5G+ service is available.

Data throughput speeds are capped at a maximum available data speed, which may not provide you with the highest speed available in a location at a specific point in time. Each plan's "UP TO" data speed is not guaranteed to be your actual speed. Actual speeds vary and may be affected by a number of factors, including your proximity to a cell site, the capacity of the cell site, the number of other users connected to the same cell site, the surrounding terrain, AT&T network management practices, the applications you use, and your in-building coverage.

If you exceed the included amount of data during your billing period, a pay per use rate for each 5Gb of data usage will apply or additional data may be easily purchased.
