AVI Foodsystems Upgrades Video, Access, and Intrusion for 70+ Locations

ALARM.COM®

"Incredibly easy, fully integrated."
Ron Craig, Security Systems Manager, AVI Foodsystems & former Police Officer

About the Company
AVI Foodsystems is a leading food service and hospitality management company headquartered in Warren, Ohio. With over 70 locations, AVI serves a wide range of clients, offering dining, catering, and hospitality solutions across multiple markets.

The Challenge
To support its expanding operations, AVI sought a reliable, scalable, and centralized security solution to replace their mixed, disparate systems for video surveillance, access control, and intrusion detection. Their goal was to streamline operations, enhance security, and reduce management complexity across multiple locations.

The Solution: Standardizing with Alarm.com for Business
After evaluating several security platforms, AVI selected Alarm.com for Business as its standardized security solution. With support from its existing security provider, AVI successfully transitioned 20+ locations to **Alarm.com's enterprise platform**, gaining centralized control of video, access, and intrusion systems. Now, AVI is planning to upgrade its remaining approximately 50 locations to Alarm.com.
